## HARPERS DRY COW

**NEW AND  
IMPROVED**

Designed and Printed by Kingsley PM. T 01363 84800

*Our products are available delivered direct to the customer or via merchants*

**Orders 01409 255 333**

**Quality Value Service**

# DRY COW RATIONS

Designed to be fed during the dry period before calving to:

- **Boost DMI**
- **Achieve higher peak yields**
- **Reduce metabolic problems**
- **Improve conception rates**
- **Correct DCAB balance**

## Harpers 16% & 23% Precalver Nuts & Rolls

A high energy diet for cows that are 'Fit not fat'. This also contains high mineral specification to help reduce the risk of milk fever, retained cleansings and to produce a healthy rumen for the next lactation

Recommended Feed Rate 2kg/head/day.

16% Available - Summer time

23% Available - Winter time

Or a 2 tonne order if not in season time

Available in 25kg, 500kg tote bags or bulk

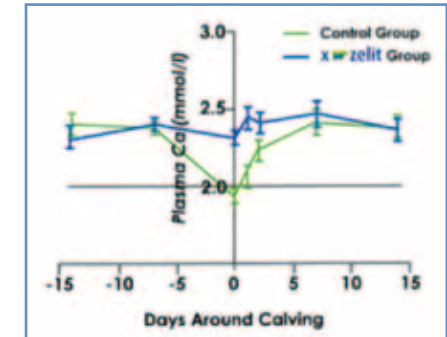

## MF Eliminator

MF Eliminator is a highly palatable dry cow feed, available in a blend or compound, containing X-Zelit. It is ideal for inclusion into TMRs or as a top dressing.

The increased demand for calcium in colostrum/milk production around calving can result in a lack of calcium in the blood causing hypocalcaemia (milk fever).

Supplementing cows with MF Eliminator for two weeks prior to calving allows the cow to maintain stable blood calcium levels around calving therefore protecting cows against hypocalcaemia as well as a range of secondary related disorders that arise as a result of calcium deficiency.

X-Zelit binds the calcium from the feed in the small intestines. This causes hormones in the cow to adjust to a condition of low availability of calcium.

Straight X-Zelit is fed at 500g per head per day for 14 days prior to calving.

The MF Eliminator blend or compound is fed at 3kg per head per day which includes the 500g of X-Zelit and the pre calver minerals.

M F Eliminator nuts and rolls are fed at 2.5kg per head per day which includes the 500g of X-Zelit and the pre-calver minerals.

Available in 25kg bags
