

The dairy range

Alka Dairy Nut

Harpers AlkaNut range has a high pH, so the alkalinity helps balance the acidity of the rumen. It has a high cereal content which is buffered by the alkagrain to prevent acidosis. The alkanut range can be specifically used to help balance acidic silages containing the product alkagrain wheat 150, which is made containing high levels of Home 'N' Dry.

FiMLAC Dairy Nut

Our FiMLAC range has been formulated as a supplement to grazing. Cattle digest the correct amount of protein cows need for production (MPE) while limiting the amount of rumen degradable protein (MPN) intake.

...your first choice

Combining exceptional local knowledge, the customer service and attention you expect from a business based on family values and the outstanding technical expertise you would demand from a leading manufacturer of quality animal feeds, Harpers Feeds are trusted by farmers across the South West.

We know all farms have different requirements so pride ourselves on having products to suit all systems and for all species, whether ruminant or monogastric. We manufacture compounds and blends and supply straights, supplements and speciality feeds as well as forage seeds and additives. Feeds are available in an extensive range of physical forms and pack sizes to give exceptional choice.

All manufactured feeds are supplied as fixed formulations so you know the next load will be the same as the last, ensuring consistent performance.

Whatever your requirements, Harpers Feeds can provide feeding solutions to deliver outstanding performance.

Dairy feeds

Focused on dairy nutrition

Harpers Feeds manufacture an extensive range of dairy feeds, formulated to provide outstanding nutrition whatever your system. Whether you are high or lower yield, grazed or housed all year round there are Harpers Dairy Feeds to help you deliver optimum performance from your cows.

Our dairy compounds and blends are formulated to help improve health, encourage high fertility and deliver cost-effective milk production by complementing home-grown forages.

Unlike other compounds and blends, all our feeds are produced to fixed formulations. To promote exceptional rumen health our feeds are also coarse ground to slow the rate of digestion and reduce the risk of acidosis.

While we are confident we have feeds for all situations, we offer a bespoke service, tailoring feeds for your cows' specific requirements.

All our feeds are backed by our FAR trained team and a range of technical support services.

The dairy range

Hi- fibre

Olympic Gold Dairy Nut

A sugar beet based high fibre nut, this range includes high levels of DUP that supplement microbial protein from the rumen and increases milk yield and quality. Also contains protected fat and maize grain.

Buttermax Dairy Nut

Our most popular high fibre nut is sugar beet based and is a really cow-friendly product enabling optimisation of the rumen, resulting in the best possible milk quality and yield.

Creamfield Dairy Nut

This is a high quality high fibre based nut with 10% sugar beet. Available from 15% to 24% protein allowing you to stay on the same cake whatever the season.

West Country Dairy

This is a high fibre nut ideally suited to grazing rations and as a compliment to high starch TMRs.

HDF Dairy Nut

Our HDF range has been formulated to promote butterfat production whilst cows are at grass. A low oil, high fibre concentrate for all grazing systems.

Hi- starch

Mega Milk Dairy Nut

Cereal and hi pro soya based dairy nut with protected soya and fat, delivering a good balance of DUP, supplementing and microbial protein from the rumen and increasing yield.

Fertility Plus Dairy Nut

This is designed to improve the heat expression rate and pregnancy rate by the inclusion of protected fat at 1.25% thereby supplying extra energy right when the cow needs it.

Devonian/Kernow Dairy Nut

High in maize grain and other rumen friendly starch sources ideal for producing high milk yield with good milk protein content. Available in 16, 18 or 21% protein level.

Max Pro Dairy Nut

This contains wheat, barley and cracked maize. Maize is a good source of bypass starch proven to increase milk yield and milk protein. Available from 16% to 24% protein level.

Reaper Dairy Nut

A starch based cake which is ideal for balancing good forages. Cost effective and available in 18% and 21% protein level.
